PROPOSAL and DEVELOPMENT PLAN DESCRIPTION

<u>Description</u>: Green Street Apartments is a relatively dense 13.33 units per acres new construction development of 80 affordable income housing located in south Longview. The development is comprised of 5 evenly distributed medium garden style walk-up residential buildings each with 8 two-bedroom/ two-bath units, 8 three- bedroom/ two-bath units.

<u>Architectural Review</u>: The building elevations and unit floor plans are attractive and functional. The units all have covered balconies or patios with storage closets.

<u>Supportive Services</u>: Supportive Services will be optional to the tenants and the cost will be included in the rent. These services will be provided by Texas Interfaith Housing and will consist of: financial counseling, education counseling, and family counseling.

<u>Schedule</u>: The Applicant anticipates construction to begin in December of 2003, to be completed in February of 2005, to be placed in service in February of 2005, and to be substantially leased-up in February of 2005.

	SITE ISSUES										
	SITE DESCRIPTION										
Size:	6.0 acres	261,360	square feet Zoning/ Pe	ermitted Uses: C-1							
Flood	Flood Zone Designation: Zone X Status of Off-Sites: Partially Improved										
	SITE and NEIGHBORHOOD CHARACTERISTICS										

<u>Location</u>: Longview is located in the northeastern part of the state, approximately 125 miles east of Dallas and 60 miles west of Shreveport, LA in Gregg County. The site is an irregularly-shaped parcel located in the southern part of Longview. The site is situated on the east side of Green Street.

Adjacent Land Uses:

No previous reports.

- North: Bostic Drive and residential dwellings
- **South:** A vacant lot, United Wholesale Florist, and residential neighborhoods
- East: Bostic Drive and residential dwellings
- West: South Green Street and an abandoned lumberyard across the street

<u>Site Access</u>: Access to the property is from the north or south along South Green Street. The development is

to have one main entry from the west side of the property. Access to the property is very good. The subject site has excellent access via Estes Parkway and Karnes Road (State Loop 281). From these two thoroughfares, one can easily connect to Interstate 20 and reach any area of Longview.

Public Transportation: The availability of public transportation is unknown.

Shopping & Services: The site is within five miles of major grocery, shopping centers, police and fire station, library, and a variety of other retail establishments and restaurants. Schools, churches, and hospitals and health care facilities are located within a short driving distance from the site.

<u>Site Inspection Findings</u>: TDHCA staff performed a site inspection on May 15, 2003 and found the location to be acceptable for the proposed development. The inspector noted the back of the property appeared to have a low spot used for drainage.

HIGHLIGHTS of SOILS & HAZARDOUS MATERIALS REPORT(S)

A Phase I Environmental Site Assessment report dated February, 2003 was prepared by Apex Geoscience Inc. and contained the following findings and recommendations:

Findings: The on-site debris should be removed from the property and properly disposed at a landfill.

Recommendations: No significant adverse environmental conditions as defined by ASTM Practice E 1527-00 were documented at the site during the course of this study.

POPULATIONS TARGETED

Income Set-Aside: The Applicant has elected the 40% at 60% or less of area median gross income (AMGI) set-aside. 80 of the units (100% of the total) will be reserved for low-income tenants. 11 of the units (14%) will be reserved for households earning 30% or less of AMGI, 8 units (10%) will be reserved for households earning 40% or less of AMGI, 16 of the units (20%) will be reserved for households earning 50% or less of AMGI, 45 of the units (56%) will be reserved for households earning 60% or less of AMGI and the remaining one unit will be employee occupied.

MARKET HIGHLIGHTS

A market feasibility study dated March 11, 2003 was prepared by Apartment MarketData Research Services and highlighted the following findings:

<u>Definition of Market/Submarket</u>: "For this analysis we utilized a primary market area comprising a 7.5 Mile Radius Trade Area in Longview, Gregg County, Texas" (p. 3)

Population: The estimated 2000 population of the defined market area was 86,694 and is expected to increase by 3% to approximately 89,591 by 2007. Within the primary market area there were estimated to be 33,405 households in 2000.

<u>Total Local/Submarket Demand for Rental Units</u>: "The available affordable rental units in this submarket are typically older and do not offer popular amenities and services." (p. 9)

ANNUAL INCOME-ELIGIBLE SUBMARKET DEMAND SUMMARY										
Market Analyst Underwriter										
Type of Demand	Units of Demand	% of Total Demand	Units of Demand	% of Total Demand						
Household Growth	8	99.3%	17	1%						
Resident Turnover	2,751	0.3%	2,391	99%						
Other Sources: pent-up demand	12	0.4%		%						
TOTAL ANNUAL DEMAND	2,771	100%	2,408	100%						

Ref: p. 8

<u>Inclusive Capture Rate</u>: The Market Analyst concluded an acceptable capture rate of 8.7%. The

Underwriter calculated an inclusive capture rate of 10% based upon a supply of unstabilized comparable affordable units of 240 divided by a revised demand of 2,408.

<u>Market Rent Comparables</u>: The Market Analyst surveyed comparable apartment projects totaling 1,662 units in the market area. "The report reflects solid demand, as did the overall macro market, for all of the competitive projects in the micro-market reviewed." (p. 106)

RENT ANALYSIS (net tenant-paid rents)											
Unit Type (% AMI)	Proposed *	Program Max	Differential	Market	Differential						
2-Bedroom (30%)-938 ft	\$247	\$247	\$0	\$524	-\$277						
2-Bedroom (40%)-938 ft	\$351	\$351	\$0	\$524	-\$173						
2-Bedroom (50%)-938 ft	\$454	\$454	\$0	\$524	-\$70						
2-Bedroom (60%)-938 ft	\$557	\$557	\$0	\$524	+\$33						
2-Bedroom (30%)-1,022 ft	\$247	\$247	\$0	\$537	-\$290						
2-Bedroom (40%)-1,022 ft	\$351	\$351	\$0	\$537	-\$186						
2-Bedroom (50%)-1,022 ft	\$454	\$454	\$0	\$537	-\$83						
2-Bedroom (60%)-1,022 ft	\$557	\$557	\$0	\$537	+\$20						
3-Bedroom (30%)-1,105 ft	\$283	\$283	\$0	\$661	-\$378						
3-Bedroom (40%)-1,105 ft	\$402	\$402	\$0	\$661	-\$259						
3-Bedroom (50%)-1,105 ft	\$521	\$521	\$0	\$661	-\$140						
3-Bedroom (60%)-1,105 ft	\$640	\$640	\$0	\$661	-\$21						
3-Bedroom (30%)-1,189 ft	\$283	\$283	\$0	\$661	-\$378						
3-Bedroom (40%)-1,189 ft	\$402	\$402	\$0	\$661	-\$259						
3-Bedroom (50%)-1,189 ft	\$521	\$521	\$0	\$661	-\$140						
3-Bedroom (60%)-1,189 ft	\$640	\$640	\$0	\$661	-\$21						

(NOTE: Differentials are amount of difference between proposed rents and program limits and average market rents, e.g., proposed rent =\$500, program max =\$600, differential = -\$100) * Adjusted to the maximum 2003 tax credit rents per 5/19/03 correspondence with Applicant.

Submarket Occupancy Rates: "The current occupancy of the market area is 94.4%, as a result of ever increasing demand." (p. 10)

Absorption Projections: "Absorption in the Primary Market Area has been steady over the last decade. Today, the area is 94.4% occupied. Based on occupancy rates currently reported by existing projects, we opine that the market will readily accept the subject's units." (p. 10)

The Underwriter found the market study to provide sufficient information to make a funding recommendation.

OPERATING PROFORMA ANALYSIS

<u>Income</u>: At the time the Applicant was completing this application, the 2003 rent limits had not been released and thus the Applicant used estimated 2002 rent limits in setting rents. Based on the Applicant's intention to charge maximum program rents and ability, according to the Market Analyst to achieve these rents, the Underwriter used the 2003 maximum rents in this analysis with the exception of the 60% two-bedroom units which exceed the Market Analyst's rents. This results in an increase of \$38.4K in potential gross rent over the Applicant's original potential gross rent. If the full maximum tax credits could be achieved on all units, an additional \$6.7K in potential gross could be achieved. Moreover, if the employee occupied unit is charged maximum tax credit rents, an additional \$6.7K in potential gross income could be projected. Estimates of secondary income and vacancy and collection losses are in line with TDHCA underwriting guidelines.

Expenses: The Applicant's total expense estimate of \$3,400 per unit is within 5% of a TDHCA database-derived estimate of \$3,568 per unit for comparably-sized developments. The Applicant's budget shows several line item estimates, however, that deviate significantly when compared to the database averages, particularly management fee (\$9.7K lower) repairs and maintenance (\$8.3K higher), utilities (\$7.3K lower), water, sewer, trash (\$6.1K higher) and property tax (\$10.6K lower). The Underwriter discussed these differences with the Applicant but the Applicant indicated only that they used averages of their properties statewide and felt comfortable with the overall expense conclusion.

<u>Conclusion</u>: The Applicant's original estimated income is inconsistent with the Underwriter's expectations and the Applicant's net operating income is not within 5% of the Underwriter's estimate. Therefore, the

Underwriter's NOI will be used to evaluate debt service capacity. Due primarily to the difference in gross rents, the Underwriter's estimated debt coverage ratio (DCR) of 1.34 exceeds the program maximum standard of 1.30. This suggests that the project could support a minimum additional debt service of \$3,874 annually. This results in a potential \$44,000 in serviceable debt, and may reduce the need for other funds. If the maximum tax credit rents could be achieved in this market additional increases in debt would be likely and they would affect the credit recommendation.

ACQUISITION VALUATION INFORMATION											
ASSESSED VALUE											
Land: (16.23) acres	\$138,770		Assessment for t	the Year of:	200	2003

Acquisition Cost:	\$275,0	75,000 Other Terms/Condition		onditions:	\$5,00	00 Earnest	Money				
Seller: TC Inves	Seller: TC Investment Properties, LLC Related to Development Team Member: No						: <u>No</u>				

CONSTRUCTION COST ESTIMATE EVALUATION

<u>Acquisition Value</u>: The acquisition price of \$ 137,500 is assumed to be reasonable since the acquisition is an arm's-length transaction and even though the total purchase price for 11 acres was \$275,000 the prorated price for 6 acres to be developed would be \$150,000 which is more than the acquisition price of \$137,500.

<u>Off-Site Costs</u>: The Applicant claimed off-site costs of \$85,000 for off-site utilities, off-site paving and entry signage and provided sufficient third party certification through a professional engineer to justify these costs.

<u>Sitework Cost</u>: The Applicant's claimed sitework costs of \$6,438 per unit are considered reasonable compared to historical sitework costs for multifamily projects.

<u>Direct Construction Cost</u>: The Applicant's direct construction cost estimate is \$96.2K or 3% lower than the Underwriter's Marshall & Swift *Residential Cost Handbook*-derived estimate, and is therefore regarded as reasonable as submitted.

<u>Ineligible Costs</u>: The Applicant incorrectly included \$26,003 in marketing, as an eligible cost; the Underwriter moved this cost to ineligible costs, resulting in an equivalent reduction in the Applicant's eligible basis.

<u>Fees</u>: The Applicant's contractor's and developer's fees for general requirements, general and administrative expenses, and profit are all within the maximums allowed by TDHCA guidelines.

Conclusion: The Applicant's total development cost estimate is within 5% of the Underwriter's verifiable estimate and is therefore generally acceptable. Since the Underwriter has been able to verify the Applicant's projected costs to a reasonable margin, the Applicant's total cost breakdown as adjusted, is used to calculate eligible basis and determine the LIHTC allocation. As a result an eligible basis of \$5,545,400 is used to determine a credit allocation of \$579,602 from this method. The resulting syndication proceeds will be used to compare to the gap of need using the Applicant's costs to determine the recommended credit amount.

Permanent Financing: The permanent financing commitment is consistent with the terms reflected in the sources and uses listed in the application. The stated underwriting rate is based on the stated spread but is considered to be of the very high end of reasonableness for this underwriting cycle. Any reduction in rate (which should be possible in this interest rate environment) at carryover or close of construction loan will result in an excess of funds based upon the maximum DCR and the gap method of calculating tax credits would require a reduction in the recommended credit allocation.

CDBG Funds: The Applicant indicted that a \$2,000 application was made to the City of Longview Community Development Block Grant Program. The documentation provided suggests that \$1,000 was requested for infrastructure and \$1,000 was requested for assisting frail and elderly. Generally any below market federal funds would be required to be deducted from eligible basis, with few exceptions. One exception is CDBG funds provided as a grant for infrastructure development. It is unknown if the CDBG funds required will meet this requirement, but it is also uncertain if the development will be successfully awarded these funds. The Underwriter removed the funds from basis which resulted in a small decline in the recommended credit amount. If the funds are ultimately not awarded to benefit this development, it will still be feasible without such funds and the difference will be made up with additional deferred develop fees.

<u>LIHTC Syndication</u>: Alliant Capital, LTD has offered terms for syndication of the tax credits. The commitment letter shows net proceeds are anticipated to be \$4,662,666 based on a syndication factor of 78%. The funds would be disbursed in a three-phased pay-in schedule:

- 1. 10% will be funded upon the latest to occur of: (a) the Limited Partner's admission into the Partnership, (b) closing of all of the construction financing for the Project, and (c) receipt of commitments for all of the permanent financing for the Project;
- 2. 80% will be funded in monthly installments based upon the progress of construction upon the latest to occur of (a) funding of all of the proceeds of the construction financing for the Project, (b) November 1, 2003, and (c) satisfaction of all conditions precedent to the payment set forth in paragraph b.1 of this section;

3. 10% will be funded upon the latest to occur of: (a) lien-free completion of construction of all the improvements sufficient for all units to be placed in service, (b) the issuance of all required permanent certificates of occupancy permitting immediate occupancy of all 80 units, (c) receipt of commitments from financial intuitions for all of the permanent financing for the Project, (d) Stabilized Operations, (e) receipt of the final cost certification, (f) permanent loan closing, (g) the issuance of an IRS Form 8609 for each building, (h) six months after payment of the Investor's third installment of its capital contribution and (i) satisfaction of all conditions precedent to the payment set forth in paragraphs B.1 and B.2 of this section; such funds to be used for hard and soft costs as required;

<u>Deferred Developer's Fees</u>: The Applicant's proposed deferred developer's fees of \$4,102 amounts to 1% of the total fees. This normal deferred developer fee means any increase in debt or reduction in cost will result in a loss of tax credits. On the other hand it allows the development maximum flexibility when it comes to any potential future cost overruns.

<u>Financing Conclusions</u>: The project can support an additional \$44,000 in first lien debt and still provide a 1.30 debt coverage ratio (DCR). This fact reduces the project's gap of actual need to \$4,622,771. Consequently, the Underwriter recommends a maximum tax credit allocation not to exceed \$592,722 annually. The Applicant initially anticipated the need to defer \$4,102 in developer fee, but based on the Underwriter's analysis, it is anticipated there will not be a need to defer a portion of the developer fee. In the event of a cost overrun or the CDBG funds not being approved all of the developer fees will be available to defer in order to maintain financial feasibility.

DEVELOPMENT TEAM IDENTITIES of INTEREST

The Applicant, Developer, General Contractor, and Property Manager firms are all related entities. These are common relationships for LIHTC-funded developments.

APPLICANT'S/PRINCIPALS' FINANCIAL HIGHLIGHTS, BACKGROUND, and EXPERIENCE

Financial Highlights:

- The Applicant and General Partner are single-purpose entities created for the purpose of receiving assistance from TDHCA and therefore have no material financial statements.
- Zimmerman Properties, LLC which is wholly owned by Zimmerman Investments, LLC; therefore, have combined financial statements which represent 99.9% ownership of the General Partner, submitted an unaudited joint personal financial statement as of September 30, 2002 reporting total assets of \$12.2M and consisting of \$96.6K in cash, \$14.6K in receivables, \$1.0M in real property, and \$11.1M in business interests and personal property. Liabilities total \$7.6M, resulting in a net worth of \$4.6M.
- The principals of the General Partner, Justin and D. Leah Zimmerman, submitted a joint unaudited financial statement as of September 30, 2002 and are anticipated to be guarantors of the development.

Background & Experience:

• The Applicant and General Partner are new entities formed for the purpose of developing the project. Justin Zimmerman and Rebecca Zimmerman, the principal of the General Partner, listed participations in several states other than Texas showing that he has completed 13 LIHTC/affordable housing developments totaling 994 units since 1999.

SUMMARY OF SALIENT RISKS AND ISSUES

- The Applicant's estimated income and operating proforma are more than 5% outside of the Underwriter's verifiable ranges.
- The significant financing structure changes being proposed have not been reviewed or accepted by the Applicant, lenders, and syndicators, and acceptable alternative structures may exist.

PROPOSAL and DEVELOPMENT PLAN DESCRIPTION

Millpoint Town homes Apartments is a moderately dense (7.57 units per acre) new **Description:** construction development of 76 units of affordable housing located in north Henderson. The development is comprised of 19 evenly distributed, two-story fourplex residential buildings as follows:

- Nine Building Type B with four two-bedroom/two-bath units; and
- Ten Building Type C with four three-bedroom/two-bath units.

Architectural Review: The units are arranged as simple and functional fourplex/townhouse buildings, with pitched roofs and private exterior entries. Each unit has a ground floor master bedroom and patio, and all bedrooms feature walk-in closets. The first floor bathroom is only accessible through the master bedroom.

Supportive Services: The Applicant identified Texas Interfaith Housing as the supportive services provider and included \$6,500 in the operating expense budget for these services.

Schedule: The Applicant anticipates construction to begin in April of 2004, to be completed and placed in service in June of 2005, and to be substantially leased-up in September of 2005.

		SITE ISSUES SITE DESCRIPTION		
Size: 10.04 Acres	437,342		rmitted Uses:	MF-1, Multifamily Residential, Low Density District

	CITE I NI		EDICTICS	_

Henderson is located in northeast Texas, approximately 30 miles southeast of Tyler in Rusk County. The site is an irregularly-shaped parcel located in the north area of the city, approximately two miles from the central business district. The site is situated on the southwest side of Kilgore Drive (U.S. Highway

Adjacent Land Uses:

▼ North: vacant land and single-family residential

≤ South: vacant land

∉ East: a wood truss plant and Kilgore Drive (U.S. Highway 259), with vacant land beyond

∉ West: single-family residential and vacant land

<u>Site Access</u>: Access to the property is from the northwest or southeast from Kilgore Drive, which provides connections to all other major roads serving the Henderson area. The development is to have two entries from Kilgore Drive.

<u>Public Transportation</u>: Public transportation is not available in Henderson, although the market analyst states, "The East Texas Rural Transit District does provide handicap transportation." (p. 6).

Shopping & Services: The site is within one mile of two major grocery/pharmacies, and a variety of other retail establishments and restaurants, schools, churches, and hospitals and health care facilities are located within a short driving distance from the site.

<u>Site Inspection Findings</u>: ORCA staff performed a site inspection on April 23, 2003 and found the location to be acceptable for the proposed development.

HIGHLIGHTS of SOILS & HAZARDOUS MATERIALS REPORT(S)

A Phase I Environmental Site Assessment report dated March 14, 2003 was prepared by The Murillo Company and contained the following findings and recommendations: "Based upon TMC's site investigation of the subject property, surrounding properties, regulatory agency records review and inquiries, interviews, and historical research, no other direct evidence was found indicating recognized environmental conditions exist at the site. TMC recommends no further action at this time." (p. 8)

POPULATIONS TARGETED

<u>Income Set-Aside</u>: The Applicant has elected the 40% at 60% or less of area median gross income (AMGI) set-aside. All of the units will be reserved for low-income households earning 60% or less of AMGI.

MAXIMUM ELIGIBLE INCOMES											
	1 Person	2 Persons	3 Persons	4 Persons	5 Persons	6 Persons					
60% of AMI	\$18,120	\$20,700	\$23,280	\$25,860	\$27,900	\$30,000					

MARKET HIGHLIGHTS

A market feasibility study dated March 18, 2003 was prepared by The Gerald A. Teel Company, Inc. and highlighted the following findings:

<u>Definition of Market/Submarket</u>: "The market area for the subject is comprised of Rusk County, which includes the city of Henderson, Texas. The entire county was chosen based on its total population, size, and overall accessibility." (Factual Data, p. 4)

Population: The estimated 2002 population of Rusk County was 47,913 and is expected to increase by 3.19% to approximately 49,442 by 2007. Within the primary market area there were estimated to be 17,571 households in 2002. (p. 7)

Total Local/Submarket Demand for Rental Units: "...there has been nominal population growth over the last ten years, which suggests that there has been minimal movement into the area from new industries...On a micro-economic level; demand does exist for low-income housing in the Henderson area. There has been no apartment construction since 1983...Increases in employment, population, households, rents, and occupancies are expected to be nominal over the next five years, therefore, primary demand will come from the existing tenant base." (p. 4)

ANNUAL INCOME-ELIGIBLE SUBMARKET DEMAND SUMMARY									
	Market	Analyst	Underwriter						
Type of Demand	Units of Demand	% of Total Demand	Units of Demand	% of Total Demand					
Household Growth	2	1%	2	1%					
Resident Turnover	158	90%	161	99%					
Other Sources: Section 8 voucher holders	15	9%	0	0%					
TOTAL ANNUAL DEMAND	175	100%	163	100%					

Ref: p. 56

<u>Inclusive Capture Rate</u>: "Overall, the total estimated LIHTC qualified demand is 175 units. Considering the 76 subject units results in a 43.4% capture rate." (p. 55) Rural developments are allowed capture rates as high as 100% per the Department's current guidelines.

Local Housing Authority Waiting List Information: "The local housing authority has four families on the waiting list for their housing...According to representatives of the Henderson Housing Authority, it is unusual that the public housing units are below 100% occupied. However, there are 17 vacant units and only four families on the waiting list. According to the Assistant Director of the Housing Authority, he anticipates that there would be adequate demand for the subject. Additionally, the tenants that occupy the public housing units would likely not be able to afford the subject at the proposed 60% of median income limit." (p. 16)

Market Rent Comparables: "Since there is no published source of apartment data for Henderson/Rusk County, we have attempted to survey all of the projects in Henderson that contain more than four units. We were able to obtain various degrees of information regarding all 11 such complexes within Henderson. There are two public housing projects within the city of Henderson. These are also included in our survey data...there are approximately 310 conventional apartment units in Henderson and 75 low-income units." (p. 15) The Market Analyst indicated that net positive adjustments of \$151 to \$217 were needed in order to account for the higher quality of housing being proposed versus the comparable rental units included in the analysis.

RENT ANALYSIS (net tenant-paid rents)									
Unit Type (% AMI)	Proposed	Program Max	Differential	Market	Differential				
2-Bedroom (60%)	\$503	\$503	\$0	\$540	-\$37				
3-Bedroom (60%)	\$579	\$579	\$0	\$615	-\$36				

(NOTE: Differentials are amount of difference between proposed rents and program limits and average market rents, e.g., proposed rent =\$500, program max =\$600, differential = -\$100)

Submarket Vacancy Rates:

- € "The overall weighted average occupancy for the conventional product in Henderson is 84%...When the low-income housing projects are considered, the citywide occupancy ratio declines to 82.7%. There are currently 17 vacant units in the two low-income projects in town. Thus, there are a total of at least 66 vacant apartment units within the city of Henderson." (p. 15)
- "In summary, the newest project in town, Spring Creek, remains 100% occupied year round. However, the next two nicest projects, Oak Manor and Point North, are having occupancy problems. According to the manager, Point North has traditionally maintained an occupancy ratio of around 75%. A visual inspection of these two projects did not reveal any obvious defects; therefore, the occupancy problem may be attributable to lack of demand from not enough rental households, poor management, high rents, or a combination of the above. These are the only two projects in the area that charge water and sewer to the residents via a Ratio Utility Billing System (RUBS). It appears that the rents at these two projects are at market; however, when the RUBS are considered, the rents appear to be above market...It appears that there is tenant resistance to the Ratio Utility Billing system in Henderson." (p. 16)

Absorption Projections: "Since there has not been any new construction of apartments in the area in a

number of years, it is not possible to gauge absorption of new product in the market area. It should be noted that there is a current inventory of 66 vacant apartment units in town. In order to achieve a stabilized occupancy level of 93%, 40 [existing] units will have to be absorbed. [Underwriter's emphasis]" (p. 16)

Known Planned Development: "According to representatives for the city permit department, and planning and zoning, there have been no recent apartment permits, nor are any rumored." (p. 3)

Effect on Existing Housing Stock: "The subject would be the newest product in town and offer the highest level of amenities...It is projected that tenants would likely come from other, older complexes in town." (p. 16) "Based on our discussions with representatives of the Henderson Housing Authority, and considering the current low occupancy ratio of the existing subsidized housing projects, we do not anticipate any measurable impact on the existing subsidized housing in Henderson...Overall, the effect of the subject property on this immediate submarket will likely be minimal, although some movement out of [existing] projects could be expected initially, as new product has an advantage over the older product, all other factors being equal." (p. 57)

Although the Underwriter found the market study provided sufficient information on which to base a funding recommendation, the Underwriter felt that it did not substantiate strong demand within the designated market area. Of particular concern are the very low market occupancy rate of 83% and the negligible projected income-eligible growth demand of two units per year. The Underwriter expressed these concerns to the analyst, and the analyst provided the following response:

- € "Our position is that the two RUBS projects which have occupancy ratios in the mid-70% range are not truly comparable to the subject due to the fact that it is not reliable in this market to compare a RUBS project to a non-RUBS project, which is what we project the project to be...non-RUBS. It is highly likely that should they discontinue the RUBS policy, occupancy would drastically increase.
- € "There are 67 Section 8 vouchers for Henderson. The Housing Authority has indicated their strong support for the subject project. Thus we would expect that the authority would send voucher holders to the subject. We have made a conservative estimate of 15 voucher holders would occupy the subject, this would likely be higher due to the newness of the subject.
- ∉ "Finally, the assistant director of the Housing Authority indicated there are a large number of people who work in Henderson, but who live in nearby cities because of a lack of new and quality apartment housing in Henderson. The director is one of such persons." (e-mail dated 5/16/03)

The Underwriter also has reservations regarding the analyst's concluded estimated market rents of \$540 and \$615 for the two- and three-bedroom units, respectively. The analyst's highest market rent comparable rents were \$390 and \$450 for these two unit types, which are significantly lower than the concluded market rents, especially in light of the low occupancy rate in the market. Absent clear evidence of substandard existing housing stock, it is difficult to reconcile this significant differential.

In light of the demographic and anecdotal evidence provided, the Underwriter regards that market demand is soft. The majority of tenants would likely be pulled from existing properties, increasing an already elevated vacancy rate of 17%. These considerations, in combination with the significant rent differential, make it possible that the development could experience an extended absorption period.

OPERATING PROFORMA ANALYSIS

<u>Income</u>: The Applicant's rent projections are the maximum rents allowed under LIHTC guidelines, and are achievable according to the market analyst.

Estimates of secondary income and vacancy and collection losses are in line with TDHCA underwriting guidelines.

Expenses: The Applicant's estimate of total operating expense is 2% higher than the Underwriter's database-derived estimate, an acceptable deviation. The Applicant's budget shows two line item estimates, however, that deviate significantly when compared to the database averages, utilities (\$9.8K lower) and water, sewer, and trash (\$15.5K higher). The Underwriter discussed these differences with the Applicant but was unable to reconcile them.

Conclusion: The Applicant's estimated income is consistent with the Underwriter's expectations and total operating expenses are within 5% of the database-derived estimate. Therefore, the Applicant's NOI should be used to evaluate debt service capacity. In both the Applicant's and the Underwriter's income and expense estimates there is sufficient net operating income to service the proposed first lien permanent mortgage at a debt coverage ratio that is within the TDHCA underwriting guidelines of 1.10 to 1.30. The Applicant's anticipated permanent debt service of \$172,500 is inconsistent with the permanent lender's term sheet underwriting rate of 7%, which yields a debt service amount of \$174,396.

Seller: Mary Beth Holm	nes Trust			Rela	ted to Develop	ment Tea	m Membe	r: No

CONSTRUCTION COST ESTIMATE EVALUATION

<u>Acquisition Value</u>: The site cost of \$110,000 (\$0.25/SF or \$10,956/acre) is reasonably substantiated by the prorated tax assessed value of \$56,662 and is assumed to be reasonable since the acquisition is an arm's-length transaction.

<u>Sitework Cost</u>: The Applicant's claimed sitework costs of \$7,411 per unit are considered reasonable compared to historical sitework costs for multifamily projects.

<u>Direct Construction Cost</u>: The Applicant's direct construction cost estimate is \$8K or less than 1% higher than the Underwriter's Marshall & Swift *Residential Cost Handbook*-derived estimate, and is therefore regarded as reasonable as submitted.

<u>Ineligible Costs</u>: The Applicant incorrectly included \$10K in marketing expenses as an eligible cost; the Underwriter moved this cost to ineligible costs, resulting in an equivalent reduction in the Applicant's eligible basis. Although the Applicant indicated an intention to charge additional rental fees for the 38 carports and 12 garages, the Underwriter retained these construction costs as eligible as the Applicant did not include any secondary income from this source.

<u>Interim Financing Fees:</u> The Underwriter reduced the Applicant's eligible interim financing fees by \$106,458 to reflect an apparent overestimation of eligible construction loan interest, to bring the eligible interest expense down to one year of fully drawn interest expense. This results in an equivalent reduction to the Applicant's eligible basis estimate.

<u>Fees:</u> The Applicant's contractor's fees for general and administrative expenses and profit are within the maximums allowed by TDHCA guidelines. The Applicant's contractor's and developer's fees for general requirements, general and administrative expenses, and profit are set at the maximums allowed by TDHCA guidelines, but with the reduction in eligible basis due to the misapplication of eligible basis discussed above now exceed the maximum by \$17,029.

<u>Conclusion</u>: The Applicant's total development cost estimate is within 5% of the Underwriter's verifiable estimate and is therefore generally acceptable. Since the Underwriter has been able to verify the Applicant's projected costs to a reasonable margin, the Applicant's total cost breakdown, as adjusted, is used to calculate eligible basis and determine the LIHTC allocation. As a result an eligible basis of \$6,179,113 is used to determine a credit allocation of \$515,338 from this method. The resulting syndication proceeds will be used

to compare to the gap of need using the Applicant's costs to determine the recommended credit amount.

FINANCING STRUCTUR	E ANALYSIS
Permanent Financing: The permanent financing commits sources and uses of funds listed in the application. As d	iscussed above, the Applicant's permanent debt

Permanent Financing: The permanent financing commitment is consistent with the terms reflected in the sources and uses of funds listed in the application. As discussed above, the Applicant's permanent debt service amount is understated by \$1,896 annually using the loan terms in the permanent lender's term sheet. **LIHTC Syndication:** The LIHTC syndication commitment is consistent with the terms reflected in the sources and uses of funds listed in the application.

<u>Deferred Developer's Fees</u>: The Applicant's proposed deferred fees of \$319,280 amount to 39% of the total eligible fees.

<u>Financing Conclusions</u>: Based on the Applicant's adjusted estimate of eligible basis, the LIHTC allocation should not exceed \$515,338 annually for ten years, resulting in syndication proceeds of approximately \$4,019,234. Based on the underwriting analysis, the Applicant's deferred developer fee will be increased to \$415,951, which represents approximately 52% of the eligible fee and which should be repayable from cash flow within approximately 12 years. Should the Applicant's final direct construction cost exceed the cost estimate used to determine credits in this analysis, significant additional deferred developer's fee may not be available to fund any development cost overruns.

DEVELOPMENT TEAM IDENTITIES of INTEREST

Larry C., Charles E., James M., James E., and C. Craig Washburn are 100% owners and principals of the General Partner, Developer, General Contractor, and Property Manager. These are common relationships for LIHTC-funded developments.

APPLICANT'S/PRINCIPALS' FINANCIAL HIGHLIGHTS, BACKGROUND, and EXPERIENCE

Financial Highlights:

- ₹ The Applicant and General Partner are single-purpose entities created for the purpose of receiving assistance from TDHCA and therefore have no material financial statements.
- ∉ The principals of the General Partner, C. Craig, Charles E., James E., James M., and Larry C. Washburn, submitted unaudited financial statements and are anticipated to be guarantors of the development.

Background & Experience:

- ∉ The Applicant and General Partner are new entities formed for the purpose of developing the project.
- ∉ Larry C., Charles E., and James M. Washburn listed participation in 13 previous affordable housing developments totaling 741 units since 1987.
- ∉ James E. and C. Craig Washburn listed participation in three previous affordable housing developments totaling 268 units since 2000.

SUMMARY OF SALIENT RISKS AND ISSUES

- ∉ The development would need to capture a majority of the projected market area demand (i.e., capture rate exceeds 50%).
- ∉ The recommended amount of deferred developer fee cannot be repaid within ten years, and any amount unpaid past ten years would be removed from eligible basis.

PROPOSAL and DEVELOPMENT PLAN DESCRIPTION

<u>Description</u>: Churchill at Longview is a relatively dense 15 units per acres new construction development of 160 units of affordable income housing located in east central Longview. The development is comprised of ten evenly distributed medium garden style walk-up low-rise residential buildings as follows:

- € (7) Building Type A with 8 one-bedroom/ one-bath units, 8 three- bedroom/ two-bath units;
- € (3) Building Type B with 8 two-bedroom/ two-bath units, 8 three- bedroom/ two-bath units;

<u>Architectural Review</u>: The building elevations and unit floor plans are attractive and functional. The units all have covered balconies or patios with storage closets.

<u>Supportive Services</u>: Supportive Services will be optional to the tenants and the cost will be included in the rent. These services will be provided by Texas Interfaith Housing and will consist of: after school programs, computer labs, ESL, community gardens and financial planning.

<u>Schedule</u>: The Applicant anticipates construction to begin in December of 2003, to be completed in March of 2005, to be placed in service in September of 2004, and to be substantially leased-up in September of 2005.

	SITE ISSUES

SITE and NEIGHBORHOOD CHARACTERISTICS

Location: Longview is located in the northeastern part of the state, approximately 125 miles east from Dallas and 60 miles west of Shreveport, LA in Gregg County. The site is a rectangularly-shaped parcel located in the east central part of Longview approximately 1.5 miles from the central business district. The site is situated on the north side of East Whaley Street between American Legion Boulevard and Shelton Street.

Adjacent Land Uses:

▼ North: commercial with some light industrial

- **≤** South: dense pine wooded area with a large park immediately to its south
- **East:** commercial with some light industrial
- ∉ West: older single family among commercial and institutional

<u>Site Access</u>: Access to the property is from the east or west along East Whaley Street. The development is to have one main entry from the south side. Access to Marshall Avenue (old U.S. Highway 80) is just north of the subject site which is the main route through Longview.

<u>Public Transportation</u>: Longview is beginning a new fixed route, scheduled transportation system on March 17, 2003. It is unknown where the closest stop will be in proximity to the site.

Shopping & Services: Much of Longview's shopping, medical facilities, churches and other community facilities are located along or near Marshall Avenue located just north of the subject site.

<u>Site Inspection Findings</u>: TDHCA staff performed a site inspection on May 15, 2003 and found the location to be acceptable for the proposed development.

HIGHLIGHTS of SOILS & HAZARDOUS MATERIALS REPORT(S)

A Phase I Environmental Site Assessment report dated March 16, 2003 was prepared by Butler Burgher and contained the following findings and recommendations:

<u>Findings</u>: In the professional opinion of Butler Burgher, no evidence or indication of recognized environmental conditions has been revealed.

POPULATIONS TARGETED

<u>Income Set-Aside</u>: The Applicant has elected the 40% at 60% or less of area median gross income (AMGI) set-aside. 160 of the units (100% of the total) will be reserved for low-income tenants. 32 of the units (20%) will be reserved for households earning 30% or less of AMGI, 16 of the units (10%) will be reserved for households earning 40% or less of AMGI, 32 of the units (20%) will be reserved for households earning 50% or less of AMGI, 80 units (50%) will be reserved for households earning 60% or less of AMGI.

MAXIMUM ELIGIBLE INCOMES										
	1 Person	2 Persons	3 Persons	4 Persons	5 Persons	6 Persons				
60% of AMI	\$19,260	\$21,960	\$24,720	\$27,480	\$29,700	\$31,860				

MARKET HIGHLIGHTS

A market feasibility study dated March 17, 2003 was prepared by Ipser & Associates, Inc. and highlighted the following findings:

<u>Definition of Market/Submarket:</u> "The primary market area for the proposed family housing complex is considered to be Gregg County." (p. 2-5)

Population: The estimated 2000 population of Gregg County was 111,379 and is expected to increase by 3% to approximately 115,000 by 2005. Within the primary market area there were estimated to be 42,687 households in 2000.

ANNUAL INCOME-ELIGIBLE SUBMARKET DEMAND SUMMARY									
	Market	Analyst	Under	writer					
Type of Demand	Units of Demand	% of Total Demand	Units of Demand	% of Total Demand					
Household Growth	32	1%	31	1%					
Resident Turnover	2,237	90%	2,211	99%					
Other Sources: 10% of Growth+Turnover	227	9%		%					
TOTAL ANNUAL DEMAND	2,495	100%	2,242	100%					

Ref: p. 3-4

Inclusive Capture Rate: "The proposed project's 160 units represent a 6.4% capture of the estimated total

2,495 income-qualified households. There are no other comparable developments that are newly opened or under development to consider along with the proposed project." (p. 3-3) The Underwriter included the supply of two other proposed developments applying for low-income housing tax credits in Longview but still calculated an acceptable inclusive capture rate of 17.89% if all developments were awarded funds.

Local Housing Authority Waiting List Information: "Waiting lists were found at 8 of the 13 complexes surveyed, for a total of 80 applicants. Properties with a waiting list include 4 private market, conventional locations, the LIHTC and HOME elderly projects, and both rental-assisted complexes. According to the Longview Housing Assistance Program, the Section 8 Voucher waiting list has 609 names, 29 of which are elderly/disabled applicants." (p. 2-20)

<u>Market Rent Comparables</u>: The Market Analyst surveyed five comparable apartment projects in the market area. "These five projects were selected because they are the most comparable among the conventional complexes in Longview." (p. 2-22)

	RENT	ANALYSIS (net t	enant-paid rents)	
Unit Type (% AMI)	Proposed	Program Max	Differential	Market	Differential
1-Bedroom (30%)	\$211	\$210	+\$1	\$490	-\$279

1-Bedroom (50%)	\$382	\$382	\$0	\$490	-\$108
1-Bedroom (60%)	\$428	\$468	-\$40	\$490	-\$62
2-Bedroom (30%)	\$248	\$247	+\$1	\$625	-\$377
2-Bedroom (40%)	\$351	\$351	\$0	\$625	-\$274
2-Bedroom (50%)	\$454	\$454	\$0	\$625	-\$171
2-Bedroom (60%)	\$557	\$557	\$0	\$625	-\$68
3-Bedroom (30%) - 1,115 ft	\$284	\$283	+\$1	\$725	-\$441
3-Bedroom (40%) - 1,115 ft	\$403	\$402	+\$1	\$725	-\$322
3-Bedroom (50%) - 1,115 ft	\$496	\$521	-\$25	\$725	-\$229
3-Bedroom (60%) - 1,115 ft	\$562	\$640	-\$78	\$725	-\$163
3-Bedroom (30%) - 1,196 ft	\$284	\$283	+\$1	\$740	-\$456
3-Bedroom (40%) - 1,196 ft	\$403	\$402	+\$1	\$740	-\$337
3-Bedroom (50%) - 1,196 ft	\$522	\$521	+\$1	\$740	-\$218
3-Bedroom (60%) - 1,196 ft	\$601	\$640	-\$39	\$740	-\$139

(NOTE: Differentials are amount of difference between proposed rents and program limits and average market rents, e.g., proposed rent =\$500, program max =\$600, differential = -\$100)

Submarket Vacancy Rates: "Among multi-family units in 2000, occupancy was 89.0% in Longview and 89.7% throughout the county. According to 100% count data, the number of vacant units decreased in Longview between 1990 and 2000 by 724 (3,087 to 2,363), while in the county, there were 1,000 fewer vacant units in 2000 than in 1990." (p. 2-7)

<u>Absorption Projections</u>: "Average absorption for the subject is estimated at 16 to 18 units per month. It is expected that about 9 months will be required to achieve 92.5% occupancy of the 160 units." (p. 2-22)

The Underwriter found the market study to provide sufficient information to make a funding recommendation.

OPERATING PROFORMA ANALYSIS

Income: The Applicant utilized rents that in some cases were well below the maximum achievable rent that was substantiated by the Market Analyst. Generally the Applicant understated the 60% rents but also the 50% rent on the smaller three-bedroom unit. Most of the remaining units are either under or over the maximum by \$1. The Underwriter utilized the maximum tax credit rents except where the Market Analyst indicated such rents were not achievable. It should be noted that the Market Analyst for two competing developments in Longview this funding cycle concluded slightly lower market rents on a per unit basis but higher on a per foot basis except for the one bedroom units which were lower on both accounts. Nonetheless, the Underwriter accepted the Market Analyst's rent conclusions for this development. Estimates of secondary income and vacancy and collection losses are in line with TDHCA underwriting guidelines.

Expenses: The Applicant's total expense estimate of \$3,464 per unit compares favorably with a TDHCA

database-derived estimate of \$3,488 per unit for comparably-sized developments. The Applicant's budget shows several line item estimates, however, that deviate significantly when compared to the database averages, particularly management fee (\$11.6K lower) repairs and maintenance (\$35K higher), utilities (\$10.6K lower) and property tax (\$18.2K lower). The Underwriter discussed these differences with the Applicant but was unable to reconcile them even with additional information provided by the Applicant.

Conclusion: The Applicant's estimated income and the Applicant's net operating income are not within 5% of the Underwriter's estimate. Therefore, the Underwriter's NOI will be used to evaluate debt service capacity. The Underwriter's estimated debt coverage ratio (DCR) of 1.52 exceeds the program maximum standard of 1.30. This suggests that the project could support additional debt service of \$32,200 annually. This results in an additional potential \$271,214 in serviceable 1st lien debt, and allows the HTF debt to increase the interest rate to 6.0%

CONSTRUCTION COST ESTIMATE EVALUATION

Acquisition Value: The acquisition price is assumed to be reasonable since the acquisition is an arm's-length transaction.

<u>Sitework Cost</u>: The Applicant's claimed sitework costs of \$7,367 per unit are within the safe harbor limit for site work costs without requiring additional documentation.

<u>Direct Construction Cost</u>: The Applicant's direct construction cost estimate is \$211K or 3% higher than the Underwriter's Marshall & Swift *Residential Cost Handbook*-derived estimate, and is therefore regarded as reasonable as submitted.

<u>Interim Financing Fees</u>: The Underwriter reduced the Applicant's eligible interim financing fees by \$25.2K to reflect an apparent overestimation of eligible construction loan interest, to bring the eligible interest expense down to one year of fully drawn interest expense. This results in an equivalent reduction to the Applicant's eligible basis estimate.

<u>Fees</u>: The Applicant's contractor's and developer's fees for general requirements, general and administrative expenses, and profit are all within the maximums allowed by TDHCA guidelines. The Applicant's developer fees also exceed 15% of the Applicant's adjusted eligible basis and therefore the eligible potion of the Applicant's developer fee must be reduced by \$7,273.

Conclusion: The Applicant's total development cost estimate is within 5% of the Underwriter's verifiable estimate and is therefore generally acceptable. Since the Underwriter has been able to verify the Applicant's projected costs to a reasonable margin, the Applicant's total cost breakdown as adjusted, is used to size the award recommendation and calculate eligible basis and determine the LIHTC allocation. As a result an eligible basis of \$11, 5,590 is used to determine a credit allocation of \$1,252,749; however this is greater than the \$1,150,000 requested. The resulting syndication proceeds based upon the requested amount will be used to compare to the gap of need using the Applicant's costs to determine the recommended credit amount.

FINANCING STRUCTURE ANALYSIS										

<u>Permanent Financing</u>: The permanent financing commitment is consistent with the terms reflected in the sources and uses listed in the application.

CDBG Funds: The Applicant indicted that a \$100,000 application was made to the City of Longview Community Development Block Grant Program. The documentation provided identifies the purpose of the funding to be for construction of the development but does not identify the type of financing structure. Any below market federal funds would be required to be deducted from eligible basis, with few exceptions. One exception is CDBG funds provided as a grant for infrastructure development. It is unknown if the CDBG funds required will meet this requirement, but it is also uncertain if the application will be successfully awarded these funds. The Applicant included no infrastructure off site costs in the budget. The Underwriter removed the funds from basis which resulted in a small decline in the eligible basis derived credit amount; however the Applicant requested an even lower credit amount. If the funds are ultimately not awarded to benefit this development, it will still be feasible without such funds and the difference will be made up with additional deferred develop fees.

<u>LIHTC Syndication</u>: Lend Lease Real Estate Investments has offered terms for syndication of the tax credits. The commitment letter shows net proceeds are anticipated to be \$9,346,000 based on a syndication factor of 80%. The funds would be disbursed in a six-phased pay-in schedule:

- 1. 30% paid upon the latest of: (a) admission date, (b) close of construction loan, or (c) receipt of permanent loan commitment;
- 2. 20% paid upon the latest of the following: (a) admission + 90 days, or (b) 25% construction completion;
- 3. 20% paid upon the latest of: (a) admission + 180 days, or (b) 50% construction completion;

- 4. 10% paid upon completion;
- 5. 10% paid upon the latest of the following: (a) final closing of the permanent loan, or (b) tax credit determination;
- 6. 10% paid upon the latest of the following: (a) 115% debt service coverage for 3 consecutive months, or (b) receipt of form 8609.

<u>Deferred Developer's Fees</u>: The Applicant's proposed deferred developer's fees of \$460,000 amounts to 30% of the total fees.

<u>Financing Conclusions</u>: Based on the Applicant's lower requested LIHTC allocation of \$1,150,000 annually for ten years, syndication proceeds of approximately \$9,198,160 will result. Based on the underwriting analysis, the Applicant will have a deferred developer fee of \$190,626 if CBDG funds are awarded for \$100,000. Should both the CDBG and HTF funds not be awarded to this development, additional first lien debt and/or deferred developer's fee will be available to fund those source losses and any development cost overruns.

DEVELOPMENT TEAM

IDENTITIES of INTEREST

The Applicant and Developer are all related entities. These are common relationships for LIHTC-funded developments.

APPLICANT'S/PRINCIPALS' FINANCIAL HIGHLIGHTS, BACKGROUND, and EXPERIENCE

Financial Highlights:

- ₹ The Applicant and General Partner LCBH GP, LLC are single-purpose entities created for the purpose of receiving assistance from TDHCA and therefore have no material financial statements.
- ∉ The Co-General Partner, Churchill Residential, Inc., submitted an unaudited financial statement as of December 31, 2002 reporting total assets of \$4.8K and no liabilities, resulting in a net worth of \$4.8K.
- ₹ The 100% Owner of the General Partner LCBH G.P, LLC, LifeNet Community Behavioral Healthcare, submitted an unaudited financial statement as of January 31, 2003 reporting total assets of \$1.7M and consisting of \$730K in current assets, \$695K in property and equipment, and \$304K in other assets. Liabilities totaled \$261K, resulting in a net worth of \$1.5M.
- ∉ The principals of the General Partner, Bradley E. Forslund and Anthony Sisk, submitted unaudited financial statements as of February 10, 2003 and December 31 respectively and are anticipated to be guarantors of the development.

Background & Experience:

- ∉ The Applicant and General Partner are new entities formed for the purpose of developing the project.
- Anthony Sisk, the principal of the Co-General Partner, Churchill Residential, Inc. has been involved as a primary participant in two affordable housing developments totaling 498 units since 2002.

SUMMARY OF SALIENT RISKS AND ISSUES

- ∉ The Applicant's estimated income and operating proforma are more than 5% outside of the Underwriter's verifiable ranges.
- The significant financing structure changes being proposed have not been reviewed or accepted by the Applicant, lenders, and syndicators, and acceptable alternative structures may exist.
